ON TIME LAPSE

About Us

EXPERTS IN FILM,
PHOTOGRAPHY
& CUSTOMER
SERVICE

On Time Lapse helps you create stunning time lapse video of your project, event, service or just about anything. Using the latest state of the art equipment allows On Time Lapse to install our camera systems just about anywhere in the world and remotely control most features. Our time-lapse camera systems use the latest 3G/4G/5G data networks to begin uploading the latest image within seconds and gives the client the ability to view that image in their own branded dashboard within seconds.

Our systems also allow for every image to be transferred to third-party storage solutions like FTP, Dropbox, Amazon S3 and many more giving your team access to high-resolution time-lapse photos seconds after they are taken. Our live dashboard system allows customers to generate time-lapse videos with just one click and view the latest 150 photos or the last 30 days of progress, whichever they choose.
